

WINNER

EXCELLENCE IN COMMERCIAL/INDUSTRIAL BUILDING \$1 MILLION TO \$2 MILLION

PARTEK INDUSTRIES PTY LTD

PROJECT PRO PHYSIO - NEW MEDICAL CENTRE,
KIDMAN PARK

ARCHITECT MARCO SPINELLI/ANTONIO LIPPIS

This building required the construction of retaining walls, and the retention of storm water on the sloping site to accommodate the single storey façade with carparking in front and the two storey rear section. The existing medical facility temporarily housed at the front of the block continued to operate throughout the entire construction period adding to the complexity of sequencing the building activity. The judges were impressed by the quality of the final design, the site organisation and the builder's ability to accommodate the various scope changes made by the client. A well executed project.
